PROFILE

Senior Back-End Developer specializing in **Node.js** and **microservices** with over 5 years' experience building **secure**, **scalable**, and **highly available** applications—particularly in fintech and emerging markets. Adept at **DevOps** practices, **cloud deployments**, and maintaining production-grade, mission-critical systems.

CORE SKILLS

- **Back-End**: Node.js (Express, NestJS), Java, Python (Django, Flask), Go, RESTful APIs
- **Frontend**: React, Next.js
- **Microservices & Architecture**: Docker, Redis, Message Queues, Event-Driven Systems
- **Databases**: MySQL, PostgreSQL, MongoDB, Redis
- **Cloud & DevOps**: AWS (EC2, RDS, Lambda), GitHub Actions, CI/CD, Docker
- **Security**: JWT, OWASP best practices, SSL/TLS, secure coding
- **Other**: Payment integrations (M-Pesa, PayPal, Stripe), Sentry for monitoring

---

PROFESSIONAL EXPERIENCE

Snospark LLC (founder)

Sep 2024 – present

- Collaborated with various clients to build diverse products using Next.js, NestJS, and React.

MNOCK Ltd — Full Stack Developer

Aug 2023 – Sep 2024 | Nairobi, Kenya

- Led development efforts for payment workflows and API integrations, demonstrating technical leadership and collaborative problem-solving. This involved integrating M-Pesa API for reliable transaction processing

- Managed AWS deployments and enhanced CI/CD pipelines, contributing to improved standards and continuous delivery practices and reduced deployment time by 40%.
- Implemented microservices architecture with Node.js and Django, deploying to AWS (EC2) via **Docker**.
- Strengthened security with JWT authentication and SSL configurations for critical payment services.
- Built Mpesa mini-app app for the Mpesa Mini Program Project

Devboxremote Ltd — Software Developer

Feb 2022 – Present (parttime) | Nairobi, Kenya

- Contributed to full-stack development (Python, Node.js, Next.js, React) for various client projects, building both web and mobile-focused applications.
- Designed and implemented a data pipeline for real-time data processing, crucial for application performance and analytics.
- Deployed and managed applications on AWS, implementing CI/CD practices

OngataWorks Ltd — Software Developer

January 2019 – April 2022 | Nairobi, Kenya

- Developed and deployed **Node.js**, **Python (Flask/Django) and Java (Spring Boot)** REST APIs on AWS (EC2, RDS, Lambda).
- Containerized applications with **Docker**, enabling seamless horizontal scaling to handle traffic spikes.
- Employed load balancing and auto-scaling strategies, maintaining zero downtime.
- Reduced latency by 50% through code reviews, refactoring, and caching enhancements.

NOTABLE PROJECTS & ACHIEVEMENTS

- **Fintech Integrations**: Integrated multiple payment gateways (M-Pesa, PayPal) into Node.js services, ensuring secure, resilient, and efficient transaction processing.
- **Security & Reliability**: Enforced OWASP top 10 guidelines, SSL/TLS encryption, and periodic security audits to protect sensitive financial data.
- **High-Availability Deployments**: Orchestrated containers and AWS resources to handle bursts in user traffic with minimal latency.

EDUCATION

- **B.S. in Software Engineering** – Kisii University (2012 – 2016)
