PROFILE

Senior Software Engineer with extensive experience specializing in high-availability back-end systems and financial technology integrations. Expert in developing secure, scalable microservices and optimizing enterprise cloud infrastructure. Proven ability to reduce operational costs and enhance deployment efficiency while maintaining strict adherence to security and compliance standards.

CORE SKILLS

- **Back-End Development:** Node.js (NestJS, Express), Java, Python (Django), Go, RESTful APIs.
- **Database Management (RDBMS):** Expert-level MySQL and PostgreSQL; experienced in data pipeline design and real-time processing.
- **Enterprise Security:** JWT authentication, SSL/TLS encryption, OWASP secure coding practices, and periodic security auditing.
- **Infrastructure:** AWS (EC2, RDS, Lambda), Docker containerization, and CI/CD automation.
- **Fintech Integrations:** Specialized in M-Pesa API, PayPal, and Stripe payment gateway architectures.

PROFESSIONAL EXPERIENCE

ElderTools LLC (Remote - USA) - Software Engineer

Jan 2023 – Present

- Developed and deployed core business products.
- Worked extensively with SQL and NoSQL databases, designing schemas and optimizing queries for efficient data management.
- Involved in real-time data processing solutions and system optimizations to meet user requirements.
- Implemented and integrated AI solutions to improve product value and output quality.

MNOCK Ltd - Lead Software Developer

Aug 2023 – Sep 2024 | Nairobi, Kenya

- Led the engineering of secure payment workflows, integrating M-Pesa APIs for mission-critical transaction processing.
- Designed and implemented core systems and software products.
- Managed AWS deployments and enhanced CI/CD pipelines, contributing to improved standards and continuous delivery practices.
- Debugged production issues and worked with stakeholders to translate end-user needs into technical solutions.

Devboxremote Ltd (Remote - UK) - Software Engineer

Feb 2022 – Present (consulting) | Nairobi, Kenya

- Deployed and managed cloud-native applications.
- Developed various software products.

OngataWorks - Software Engineer

2018 – Feb 2022 | Nairobi, Kenya

- Achieved a reduction in AWS expenditure through rigorous service optimization and storage performance tuning.
- Developed custom software solutions to streamline internal enterprise business processes such as Asset Management solutions and accounting systems.

EDUCATION

- **B.S. in Software Engineering, Kisii University, 2016**
